CANVAS OR PANEL

Acrylic primed and toned grounds are recommended for the workshop. Students should bring at least 10 12" x 16" canvases. The canvases should be toned in advance. Cotton and linen are acceptable.

CANVAS TONING PROCESS:

On pre-stretched, pre-primed canvas, one to two coats of Golden Acrylic N6 Neutral Gray paint diluted with water should be applied to the surface with a brush. The mixture ratio is approximately two parts water to one part paint. To apply the tone, first cover the entire surface of the canvas with the mixture using a 2-inch or 3-inch wide brush. When the surface is completely covered, make sure the paint surface is smooth by lightly dragging the brush through the paint from one edge to the other across the entire surface. The finished canvas should have a smooth gray finish not oversaturated with some streaks of the canvas background slightly visible. Be careful to not apply the paint too thickly because it becomes too slick and reduces the absorbency of the canvas. This makes it harder to apply the paint evenly.
